

## LISTING OF THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1.- (Original) A sodium hypochlorite-based bleaching composition that comprises water, a phosphate compound and/or phosphoric acid; wherein the composition has a value of pH 11 that provides the formulation with a higher stability for household use.

2.- (Original) The bleaching composition according to claim 1, wherein the phosphate compound is disodium phosphate dodecahydrate.

3.- (Currently Amended) The bleaching composition according to ~~claims 1 or 2~~ claim 1, wherein the disodium phosphate dodecahydrate is present in a ratio of 2% in the composition.

4.- (Currently Amended) The bleaching composition according to ~~claims 1 to 3~~ claim 1, wherein the phosphoric acid is present in the composition in a 1% ratio.

5.- (Currently Amended) The bleaching composition according to ~~claims 1 to 4~~ claim 1, wherein water is present in a 97% ratio.

6.- (Original) The bleaching composition according to claim 1, wherein the phosphate compound is diphosphoric-1,1-hydroxyethane-1 acid.

7.- (Original) The bleaching composition according to claim 6, wherein the diphosphoric-1,1-hydroxyethane-1 acid is present in a 1% ratio in the composition.

8.- (Currently Amended) The bleaching composition according to ~~claims 6 and 7~~ claim 6, wherein the phosphoric acid is present in a 2.3% ratio.

9.- (Currently Amended) The bleaching composition according to ~~claims 5, 6, 7 and 8~~ claim 5, wherein water is present in a 96.7% ratio.

10.- (Original) The bleaching composition according to claim 1, wherein the phosphate compound is absent and the phosphoric acid is present in a 3.5% ratio.

11.- (Original) The bleaching composition according to claim 10, wherein the water is present in a 96.5% ratio.

12.- (Original) A sodium hypochlorite-based bleaching composition that comprises water, a phosphate compound and/or phosphonic acid; wherein the composition shows a value of pH 7 that provides the formulation with a higher stability for industrial use.

13.- (Original) The bleaching composition according to claim 12, wherein the phosphate compound is diphosphoric-1,1-hydroxyethane-1 acid.

14.- (Currently Amended) The bleaching composition according to ~~claims 12 and 13~~ claim 12, wherein diphosphoric-1,1-hydroxyethane-1 acid is present in a 2% ratio in the composition.

15.- (Currently Amended) The bleaching composition according to ~~claims 12, 13 and 14~~ claim 12, wherein the phosphoric acid is present in a 4.5% ratio.

16.- (Currently Amended) The bleaching composition according to ~~claims 12 to 15~~ claim 12, wherein water is present in a 93.5% ratio.

17.- (Original) The bleaching composition according to claim 12, wherein phosphate compound is absent and phosphoric acid is present in a 7% ratio.

18.- (Currently Amended) The bleaching composition according to ~~claims~~

~~16 and 17~~ claim 16, wherein water is present in a 97% ratio.

19.- (Original) A sodium hypochlorite-based bleaching composition, which comprises water, a phosphate compound and/or phosphonic acid; wherein the composition shows a value of pH 7 which provides the formulation with a higher stability for industrial use.

20.- (Original) The bleaching composition according to claim 19, wherein the phosphate compound is diposphoric-1,1-hydroxyethane-1 acid.

21.- (Original) The bleaching composition according to claim 20, wherein the diposphoric-1,1-hydroxyethane-1 acid is present in a 2% ratio in the composition.

22.- (Currently Amended) The bleaching composition according to ~~claims 19, 20 and 21~~ claim 19, wherein the phosphoric acid is present in a 4.5% ratio.

23.- (Currently Amended) The bleaching composition according to ~~claims 19 to 22~~ claim 19, wherein water is present in a 93.5% ratio.

24.- (Original) The bleaching composition according to claim 19, wherein the  $\sqrt{\text{phosphate}}$  compound is absent and phosphoric acid is present in a 7% ratio.

25.- (Original) The bleaching composition according to claim 24, wherein water is present in a 93% ratio.

26.- (Original) A method for bleaching textile fibers wherein a solution according to claim 12 is used as additive.

27.- (Original) The method for bleaching, according to claim 26, wherein the textile fiber can be clothes of mixed fibers (mezclilla).

28.- (Original) The method for bleaching, according to claim 26, wherein a necessary amount of additive is added to carry the solution to a pH of 7.
